

### **EquiQuery® Equitable DataWarehouse Consultants**

EquiQuery Corporation provides worldwide services and software to enterprises pursuing large-scale data warehousing initiatives. Using state-of-the-art technologies, we bring real solutions to market. Our consultants are all Teradata® V2R5 Certified Masters.

You may contact the authors or send an

e-mail to [pspartner@equiquery.com](mailto:pspartner@equiquery.com) more information.

# EquiQuery Monitor©

## Teradata® session monitoring made easy

*Much has been made of the Active Data Warehouse in recent years. Hardware and software have become sophisticated and specialized in performing large table scans, indexed access, and sort/merge. Further, mixed workloads are now commonplace. Interrelationship of query workload among strategic and tactical requests requires DBA's to be alert - in the moment.*

### Active DW requires Active Monitoring

*The Active monitoring model offers an additional approach to discovering workloads in your Active Datawarehouse.. Active Monitoring supplements standard SQL logging mechanisms which capture query metadata to tables. Active monitoring leverages facilities in the RDBMS, network, and client platform to visually discover workload. Inspecting a SQL request as it progresses through its optimizer plan adds a powerful tool in tuning a query.*

### Technology

EquiQuery Monitor© is a thin footprint, object-model win32 application. Internally, its foundation exploits threading, point-to-point messaging, recursion, events, and data structures to simultaneously track multiple concurrent sessions, in the Teradata® environment.

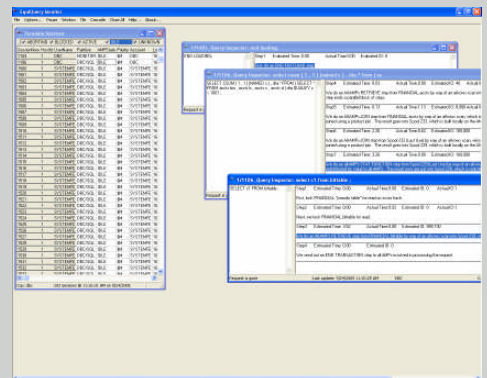

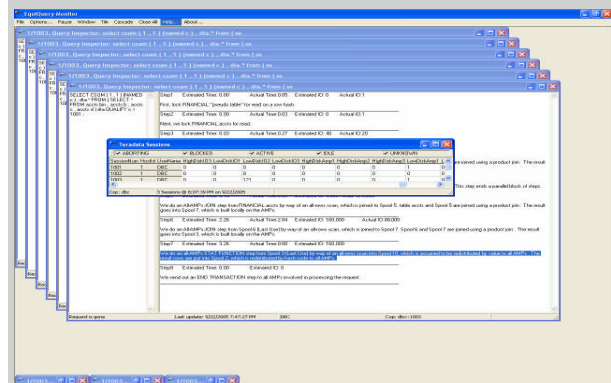

### Uniting the DW organization

Using EquiQuery Monitor, DBA's will gather workload insights like never before. SQL sessions originating from LAN workstation to mainframe TDP's can all be captured. DBA's can provide feedback from new indexing strategies to SQL construction and statistics. The only limit is personal creativity. Blocking situations are noted in easy-to-understand phrases plus audible alerts for notification.

### No limits to process optimization

### Touch one, take all

That is our philosophy. We display every relevant piece of PMPC data possible for sessions. This provides an emergence of information to boost your knowledge of session workloads in near real-time.

## About the authors

Dwight Etheridge is President of EquiQuery Inc, and may be contacted at [dwight.etheridge@equiquery.com](mailto:dwight.etheridge@equiquery.com)

## Acknowledgements

Borland®, Microsoft®, and NCR® for their API's

## About EquiQuery Consulting Services

EquiQuery Corporation provides worldwide services and software to enterprises pursuing large-scale data warehousing initiatives. Using state-of-the-art technologies, we bring real solutions to market. Our consultants are all Teradata® V2R5 Certified Masters.

**See your Teradata DW workload like never before**

### Get the Evaluation Edition...

In September 2005, a fully functional EquiQuery Monitor, Evaluation Edition was announced. The distribution includes product and full detail technical manual in PDF format. To get your copy, send email including your name and address to:
